

AI / Machine Learning Engineer

NexaAI Technologies

We are looking for an AI / Machine Learning Engineer to build and deploy production-grade machine learning and AI systems.

Responsibilities

- Design, train, evaluate, and deploy machine learning and AI models.
- Build NLP, embedding, semantic-search, RAG, or LLM-powered applications.
- Develop reliable Python backend services and REST APIs for model inference.
- Work with SQL/PostgreSQL and production data pipelines.
- Containerize and deploy services using Docker and cloud infrastructure.
- Collaborate with software engineers and product teams to deliver measurable AI features.

Required Qualifications

- Bachelor's or Master's degree in Computer Science, Artificial Intelligence, Software Engineering, or a related field.
- 3+ years of professional experience in machine learning or AI engineering.
- Strong Python skills and experience with PyTorch or TensorFlow.
- Experience with NLP, embeddings, LLM applications, or recommendation/search systems.
- Experience building REST APIs and production backend services.
- Experience with SQL and PostgreSQL.
- Familiarity with Docker, Git, CI/CD, cloud platforms, and model deployment.
- Strong problem-solving, communication, and teamwork skills.

Screening Notes

Candidates should be scored against explicit evidence in the resume. Missing or ambiguous dates/skills should lower confidence and trigger manual review rather than being guessed.
