

Ahmad Al-Khatib

Candidate 1 — Strong Match

Damascus, Syria | ahmad.khatib@example.com | +963 9XX XXX XXX | github.com/ahmadalkhatib

Professional Summary

AI Engineer with 5+ years of experience designing, training, and deploying machine learning systems, with a strong focus on NLP, embeddings, LLM applications, and production APIs.

Technical Skills

Python, PyTorch, TensorFlow, scikit-learn, Hugging Face, Transformers, LangChain, PostgreSQL, FastAPI, Docker, GitHub Actions, AWS, MLflow, NLP, embeddings, RAG, vector search

Education

B.Sc. in Artificial Intelligence — Damascus University, 2020

Professional Experience

Senior AI Engineer — LevantAI, Damascus | 2023–Present

Designed RAG and semantic-search services; fine-tuned transformer models; built FastAPI services; deployed models with Docker and AWS; implemented PostgreSQL-backed pipelines.

Machine Learning Engineer — DataVision, Damascus | 2020–2023

Built NLP classification and recommendation models with PyTorch and TensorFlow; created embedding pipelines and model evaluation workflows.

Additional Information / Notes

Selected project: multilingual document retrieval system using transformer embeddings, PostgreSQL metadata, vector search, and automated evaluation.
